NURARAT **SANGREUANG**

Software Developer

Bangkok, Thailand | nurarat0024@gmail.com | github.com/Issacboox | LinkedIn: Nurarat Sangreuang | portfolio.gogomaru.com

PROFILE INFO

Backend Developer with over 2 years of experience developing backend services and enterprise integrations. Strong in API development, database design, and performance optimization, with hands-on experience in OpenShift, Docker, and CI/CD pipelines. Experienced in integrating Oracle WebCenter Content (WCC) and K2 workflows to support enterprise document and AI data pipelines. Fast learner who adapts quickly to new technologies and enjoys sharing knowledge with teammates. Interested in full-stack development, with backend engineering as my core strength.

EXPERIENCE

Jul 2026 - PRESENT
BusOnlineTicket
Software Developer (full stack, fully remote)

- Implement new features end to end, across backend APIs and frontend
- Integrate new vendors (operators) to pull in their data, and build tools to manage trips and routes
- Built a LINE chatbot and integrated a payment gateway
- Integrated Facebook and Google, including pulling customer reviews from Google
- Work directly with vendors on requirements, data formats and go-live

Aug 2024 - Jul 2026
Sirisoft Public Company Limited
Software Development

- Designed and developed backend APIs for business systems including e-Quotation, e-Commerce, and Car Sales platforms using .NET
- Experienced in deploying applications on OpenShift and working with Docker. Familiar with supporting CI/CD processes using Tekton pipelines.
- Optimized database queries and API response handling to improve backend performance and system reliability
- Integrated enterprise systems including Oracle WebCenter Content (WCC) and K2 workflows for document
- Contributed to API specification design for AI data ingestion workflows, ensuring structured and reliable data flow
- Applied SonarQube for code quality and participated in code reviews
- Collaborated in an Agile Scrum environment using Jira

Apr 2023 - Jun 2023
Toyota Material Handling Warehouse Solution (Thailand)
Software Engineer Intern

- Ticketing System: built a website for reporting issues and tracking status and resolutions, with in-app messaging.
- API Documentation: wrote web-based API guides for developers, aligned with company standards.
- Server Room: regular checks for performance, security and environmental issues.

PROJECTS

NurOS (portfolio.gogomaru.com): desktop-style portfolio with an AI assistant that answers from my own documents with citations (RAG). Next.js 16, TypeScript, Three.js.

Maru Desk (live, marudesk.gogomaru.com): quotes, invoices, receipts and PromptPay QR payments for small Thai businesses. Next.js, React.

Private LLM platform (building): self-hosted AI assistant with Ollama/vLLM, RAG on pgvector, evals, OCR and audit log. Next.js, Docker, Python.

JoybiniTour, MARU travel booking (in progress): travel booking sites and back office with partner (B2B) approval. Next.js, .NET.

EDUCATION

2020 - 2024 | Burapha University
Information Technology (IT)
GPA 3.13

PROGRAMMING LANGUAGES

- C#, JavaScript, TypeScript
- HTML, CSS
- Basic understanding of Java

BACKEND

- .NET (Version 4.6, 8, 10)
- NodeJs

DATABASE

- SQL (Microsoft SQL Server, PostgreSQL, Oracle)
- Database Design
- Query Optimization

DEVOPS & PLATFORM

- Docker, OpenShift
- Tekton Pipeline, CI/CD
- AWS S3, MinIO

FRONTEND

- React, TypeScript, Next.js (basic)

TESTING & QUALITY

- xUnit, SonarQube, Code Review, Robot Framework (basic)

TOOLS

- Git, Jira, RabbitMQ

LANGUAGES

- English (Intermediate)
- Thai (Native)

CERTIFICATE

- **Information Technology Professionals Examination (ITPE)**: Information Technology Passport Examination (IP)
